

We have trained 113,458 caregivers to benefit the lives of 377,035 young children.

We are OneSky. OneSky for all children.

OneSky envisions a world where all children have the opportunity to reach their full potential. We partner with governments and communities in Asia to provide responsive care and safe learning environments so that marginalized young children can thrive.

Since our founding in 1998, OneSky has trained and supported the caregivers of young children in low-resourced communities, ages 0-8, who have been orphaned, abandoned, left behind, or impacted by migration. During our first 20 years, we helped transform the lives of tens of thousands of children in Chinese welfare institutions by training adults to provide them with nurturing care. Based on that experience, we realized we had a model for supporting marginalized young children throughout Asia.

While our work in mainland China continues, we benefit even more children in need through partnerships with the governments of Vietnam and Mongolia and through the P.C. Lee OneSky Global Centre for Early Childhood Development in Hong Kong SAR.

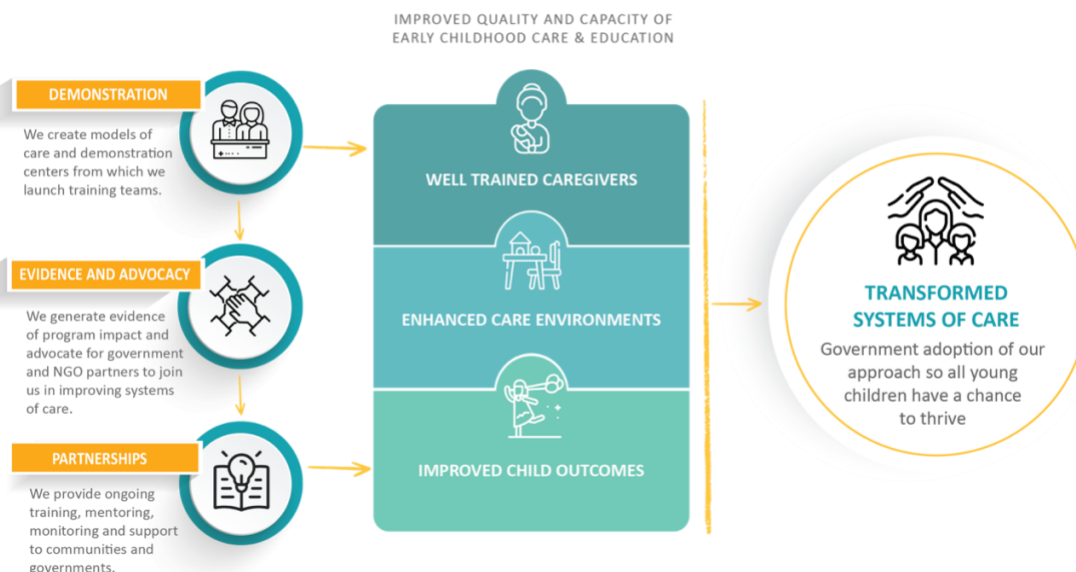

We recognize that the needs of all young children are fundamentally the same and that with consistent responsive care and loving attention, children born into even the most difficult circumstances can thrive and be changemakers in their communities and the world.
